

ENVIRONMENTAL POLICY STATEMENT

Mildren Construction Limited is a regional company operating in the south of England. The Directors of the company recognise the impact its operations have on the environment. Mildren Construction Limited is committed to pollution prevention and protection of the environment; identifying, monitoring and managing environmentally significant activities and where possible, contribute to the protection and enhancement of surrounding environments.

As part of the commitment to environmental leadership the company will:

- Promote a culture of environmental responsibility and environmental improvement through effective leadership, communication and training.
- Comply with relevant environmental legislation, client and other requirements applicable to our work.
- Assess the environmental impact of our operations during planning, design and construction phases so as to prevent pollution, destruction or disturbance of the external environment.
- Maintain and improve our management systems to ensure they remain registered as meeting the requirements of BS EN ISO 14001:2015.
- Conduct regular reviews to monitor performance, investigate all incidents, set objectives and targets and strive for continuous improvement.
- Incorporate the principles of environmental sustainability into our design and construction practices, encouraging and supporting clients and designers to adopt similar principles.
- Encourage the use of environmentally sustainable materials and environmental low impact technologies.
- Uphold the 3R's waste principle, Reduce, Recycle and Reuse, in all relevant business activities.
- Optimise our use and consumption of natural resources, including fuels, water and raw materials.
- Promote these environmental principles to our supply chain and encourage environmental product lifecycle philosophy.
